

Team 3 Presents...

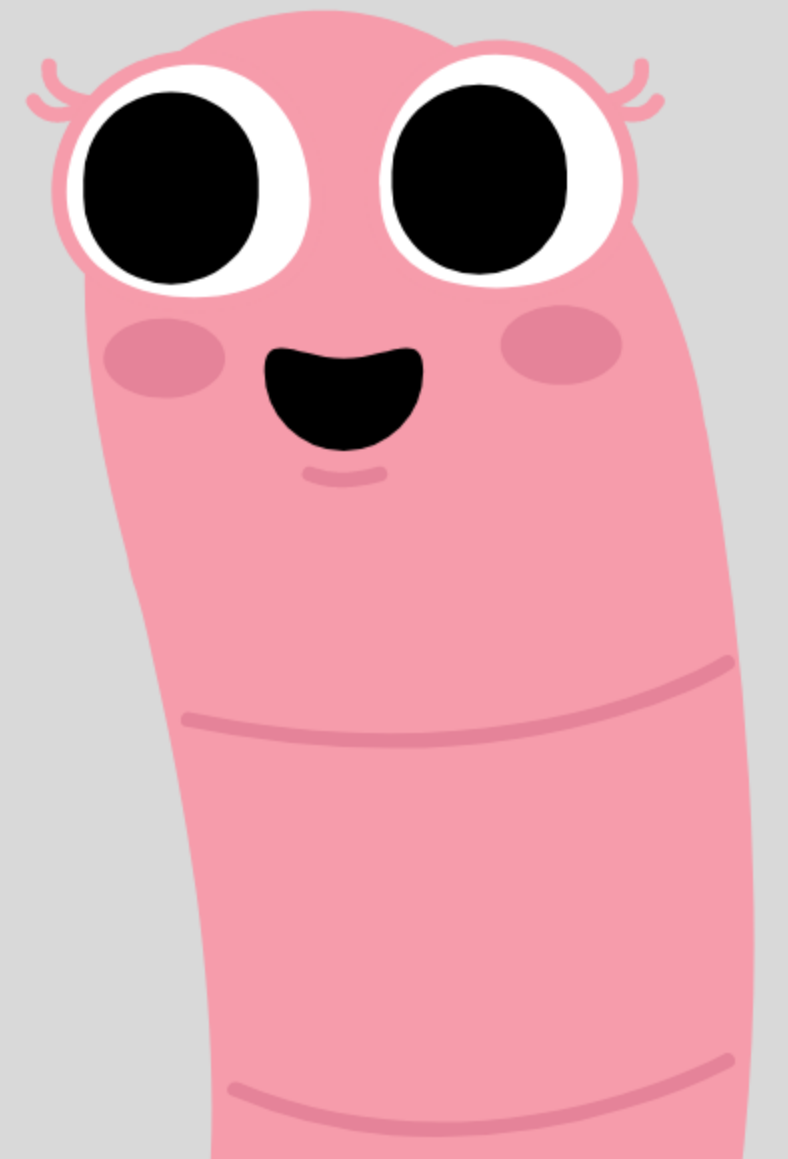

A
(Very Wormy)
Vermicomposting
Adventure

Hi friends!
I'm your earthworm,
Bio!

Waste in our
world grows
every day.

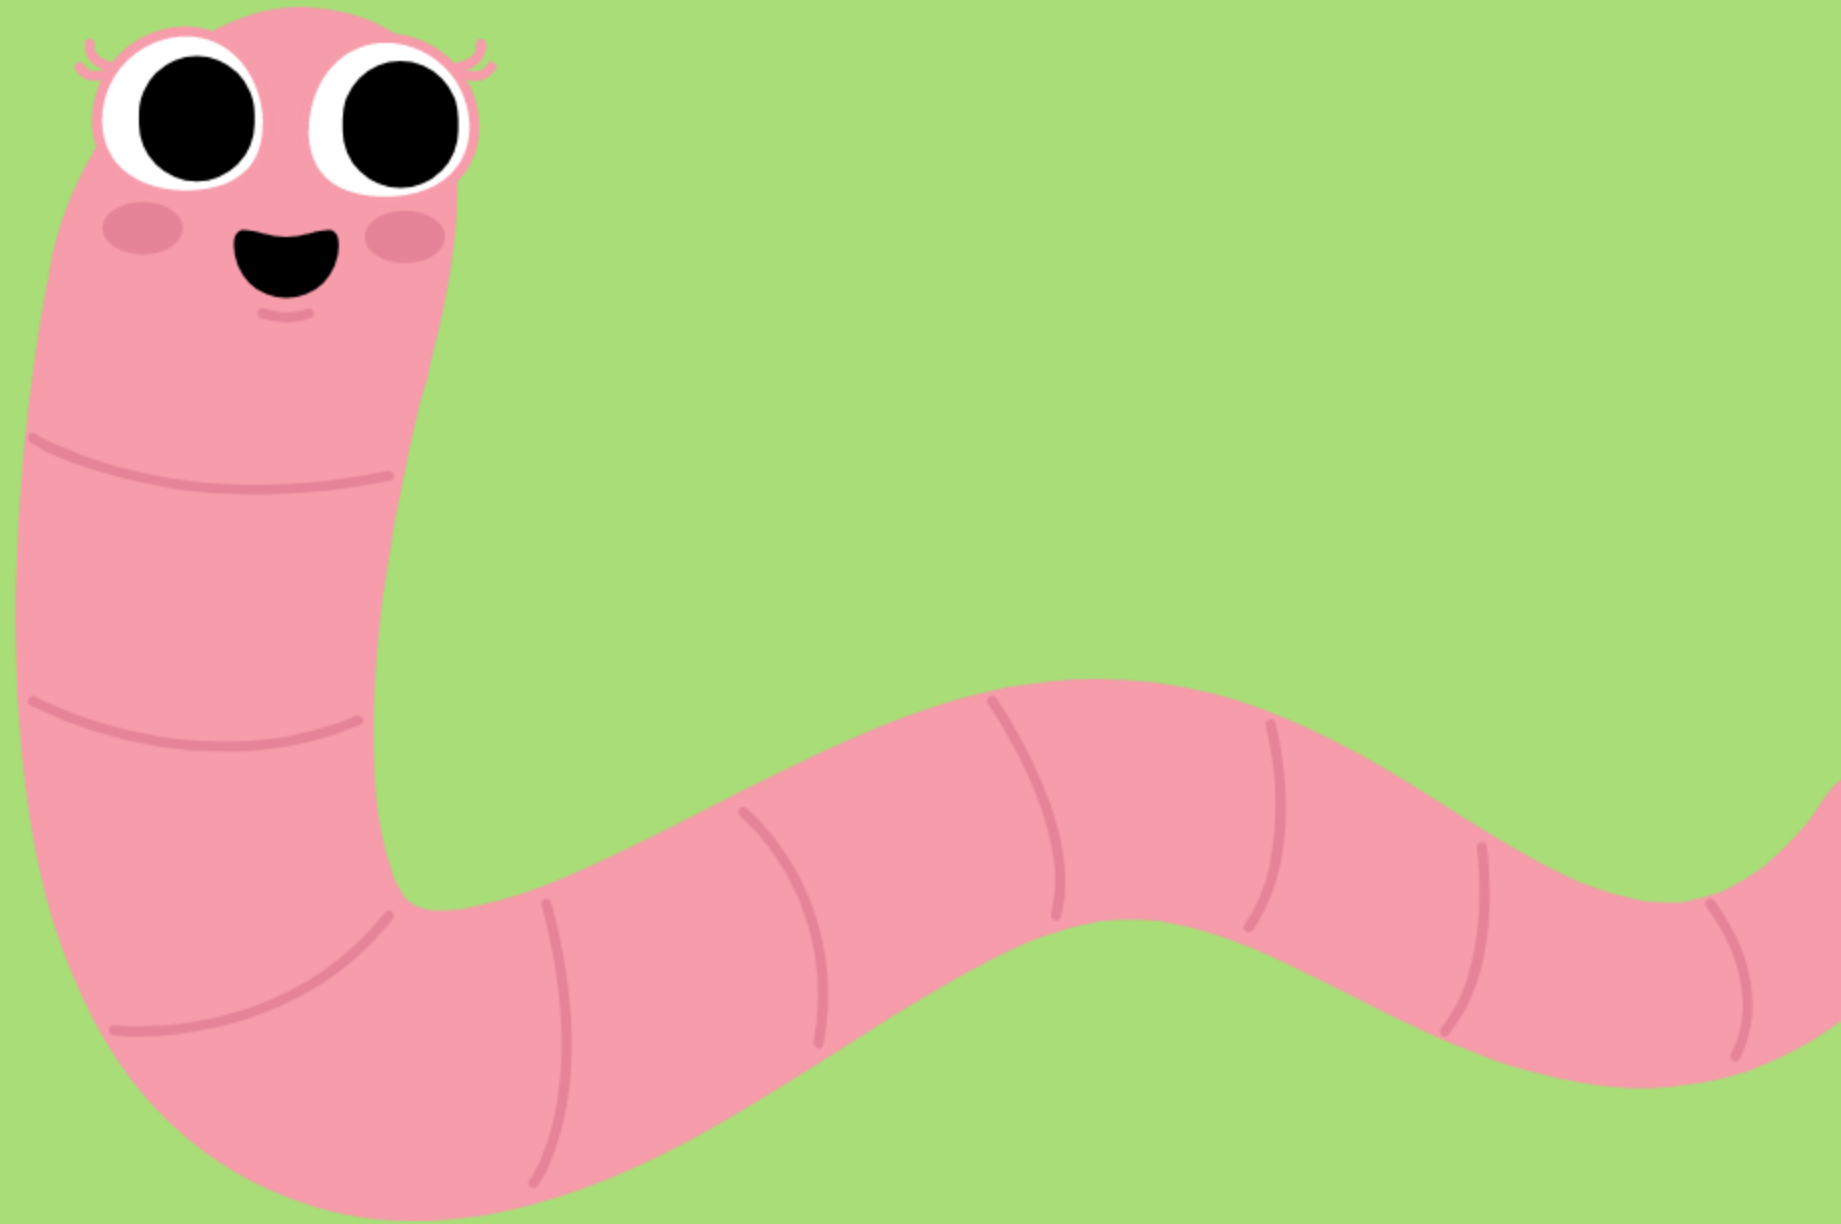

As a
Red Wiggler Worm,
I can help with that!

It's called
vermicomposting!

I reduce waste by
eating it away!

After, the waste
becomes
nutrient-filled soil!

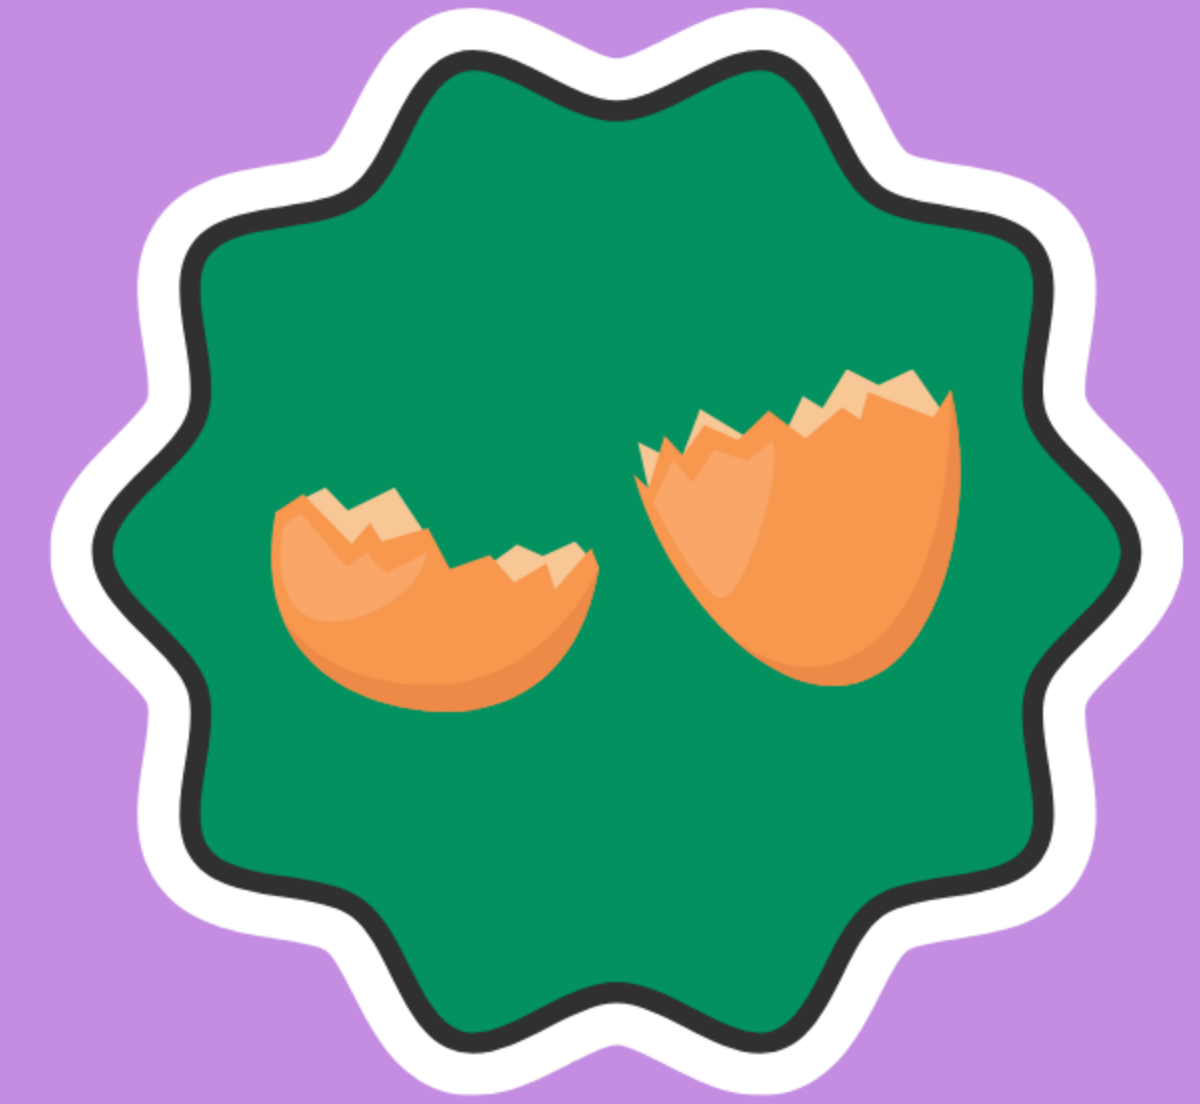

I can't eat
everything,
but what
can I eat?

Vegetables and most fruit!

Cotton clothing!

Clean eggshells!

Tea leaves and
coffee grounds!

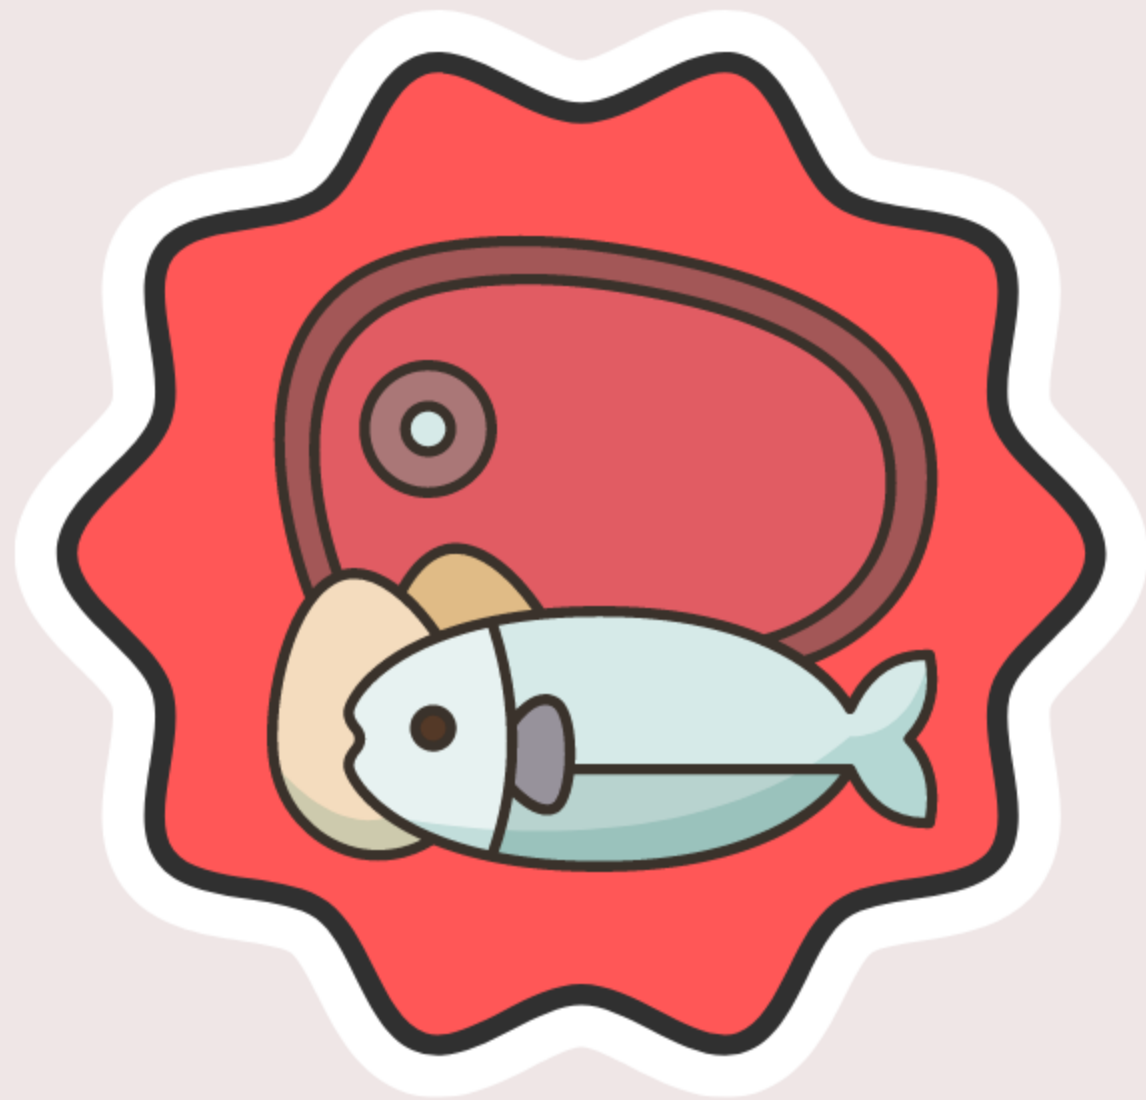

Newspaper!

Watch out
for these
foods!

My
stomach
can't digest
them.

No protein!

No citrus!

No dairy!

Oh no! The landfill
is filling up!

Good thing I'm
hungry!

Help me decide
what to eat!
